

Agile Methodology for BPM

Applying Agile Concepts and Principles to BPM

Agile Methodology for BPM discusses how to apply agile concepts, principles, and standards for members of Business Process Management including analysts, project managers, and leaders. Providing value more frequently in BPM is emphasized. This class is excellent for BPM practitioners who are working with scrum teams and for leaders who want to inject agile principles into their process improvement departments.

Agile Methodology for BPM improves the BPM process by applying agile in order to deliver customer value more frequently. The focus is on using agile to improve quality, efficiency, and consistency in the BPM process. This class provides real world examples and actionable insights for injecting agile into your BPM initiatives.

Agile Methodology for BPM provides the foundation for any BPM professional who wants to apply agile to Business Process Management. An increasing number of companies are finding that agile principles can be successfully applied to process improvement initiatives resulting in faster delivery of value to customers. This course teaches BPM professionals the agile methodology including the standard values and principles used while discussing the role that agile can play in their BPM program. Specific topics covered include the agile principles, sprint cycle, iterative design, minimum viable product (MVP), agile ceremonies, continuous improvement concept, and the customer feedback process. Whether you are a BPM analyst who is working with scrum teams or a leader who wants to inject agile principles into your process improvement department, this class is for you.
