

Agile BPM Roles and Responsibilities

BPMInstitute.orgSM

Redefining Agile Structure for BPM Applications

The Agile BPM Roles and Responsibilities class focuses on how to implement agile in BPM initiatives. Participants will learn how to apply agile principles to BPM and the agile BPM delivery life cycle. In addition they will learn how to adapt roles in agile and how to setup process improvement work that delivers value more quickly to internal and/or external customers.

Agile BPM Roles and Responsibilities presents actionable insights into how to implement agile in your BPM program including creating new roles for agile teams. Participants will learn how to setup BPM work to best deliver value more frequently as well as how to effectively organize agile teams for their different BPM initiatives.

Agile BPM Roles and Responsibilities provides the foundation for any BPM professional who wants to apply agile basics to Business Process Management. An increasing number of companies are finding that agile principles can be successfully applied to process improvement initiatives resulting in faster delivery of value to customers. This course teaches BPM professionals how to implement the agile methodology within their BPM program. Specific topics covered include agile BPM delivery life cycle, agile principles for BPM, project management in agile, and redefining agile roles for agile BPM. Exercises are interwoven into the lessons to provide hands-on practice and allow the students to discuss real-world implementation of the concepts learned. Whether you are a BPM analyst who is working with scrum teams or a leader who wants to use agile principles in your process improvement department, this class is for you.
